

# SHAPE: Sustainable development pathways achieving Human well-being while safeguarding the climate And Planet Earth

Overview of the project

# SHAPE: Objectives

- Investigate interactions between mitigation of climate change and the broader agenda of the Sustainable Development Goals (SDGs)
- Develop and analyse Sustainable Development Pathways that
  - achieve the SDGs in 2030
  - maintain sustainable development afterwards
  - reach the climate goals of the Paris agreement

# Consortium partners

POTSDAM INSTITUTE FOR  
CLIMATE IMPACT RESEARCH

**PIK** (Germany): project lead,  
integrated assessment modelling,  
water-energy-land nexus, sustainable  
development pathways

**IIASA** (Austria):  
integrated assessment  
modelling, decent living  
standards

**IASS** (Germany):  
stakeholder dialogue,  
co-design of scenarios

**Stockholm Resilience Centre**  
Sustainability Science for Biosphere Stewardship

Universiteit Utrecht

**SRC** (Sweden): stakeholder  
dialogue, governance of  
trans-formations

**UU** (Netherlands): integrated  
assessment modelling, water-  
energy-land nexus

**NTNU** (Norway): industrial  
ecology, resource footprints

d.i.e

Deutsches Institut für  
Entwicklungspolitik

German Development  
Institute

**DIE** (Germany):  
governance of transformations,  
political economy

# Project Structure

WP1 (IASS/SRC): Stock-take & stakeholder interaction

WP4 (IIASA): Climate and inequality

WP2 (PBL): Climate and the Water-Energy-Land Nexus

WP5 (DIE/SRC): Governing the transformation

WP3 (IIASA): Sustainable production and consumption

WP6 (PIK): Sustainable Development Pathways for achieving climate and other sustainability goals

# SDG Coverage

WP2 (PBL): Climate and the Water-Energy-Land Nexus

WP3 (IIASA): Sustainable production and consumption

WP4 (IIASA): Climate and inequality

WP5 (DIE/SRC): Governing the transformation

WP6 (PIK): Sustainable Development Pathways for achieving climate and other sustainability goals

Above SDGs + Scenario design and input assumptions for:

## Narrative cross-cutting activity

---

**Goal:** Develop a set of new SDP narratives highlighting branching points that give rise to a multiplicity of ways to a sustainable futures. Those narratives would form the basis for the development of quantitative SDPs.

**Step 1:** Identify narrative domains and develop sub-narratives and branching points for these domains: Societal governance, International Architecture, Future of Work, Energy, Land, Water, Consumption & Production, Urban/Rural life, Mobility

**Step 2:** Organize sub-narratives into a set of overarching narratives

**Step 3:** Run extensive stakeholder and expert consultations on draft narratives

**Step 4:** Revise and finalize until end 2020

## Scientific Advisory Board

- 
- Dirk Messner (German Federal Agency of the Environment)
  - Jale Tosun (U Heidelberg)
  - Vaibhav Chaturvedi (CEEW)
  - Zoi Vrontisi (E3Mlab)

## Target audience and users

---

- UN Sustainable Development Solutions Networks (SDSN)
- UN High-level political forum on Sustainable Development
- Local/regional SDG initiatives & policymakers
- IPCC AR6 & AR7
- UNFCCC global stocktake
- ...

## Research connections

---

### The World in 2050:

- research initiative to support the implementation of the SDGs until 2030 and beyond (most SHAPE partners involved)

### Horizon 2020 projects:

- NAVIGATE: next-generation integrated assessment models (coordinated by PIK)
- ENGAGE: informing global and national climate action (coordinated by IIASA)

### JPI axis projects:

- CHIPS: distributional impacts and inequality (coordinated by PIK)
